"Subject Index- Social and Technical Issues in Testing: Implications for Test Construction and Usage" (1984). *Social and Technical Issues in Testing: Implications for Test Construction and Usage*. 13. <https://digitalcommons.unl.edu/burostestingissues/13>

This Article is brought to you for free and open access by the Buros-Nebraska Series on Measurement and Testing at DigitalCommons@University of Nebraska - Lincoln. It has been accepted for inclusion in Social and Technical Issues in Testing: Implications for Test Construction and Usage by an authorized administrator of DigitalCommons@University of Nebraska - Lincoln.

Subject Index

A

Achievement, 129, 130, 155
Achievement-saturated intelligence tests,
53–54
Alternative choice items, 148–149
Examples, 150, 151
American Civil Liberties Union, 94
American College Testing Programs (ACT),
18
Applied performance testing, 147
Aptitude, 129, 130, 167
AQ (Achievement or accomplishment quo-
tient), 5, 130, 131

B

Bias in Mental Testing, 17
Bentee, 29, 136
Bloom's Taxonomy, 143
Buros Institute of Mental Measurement, 4, 11,
12, 34, 111, 113–116, 118–125

C

Casual models, 31
Cognitive psychology
Definition, 3, 40
Implications for score interpretation, 3, 49,
50

Implications for test modification, 3, 51–57
Implications for test validation, 3, 48, 49
Ways to study, 3, 40, 45
Choice reaction-time tasks, 46
Cognitive abilities, 158
Comprehensive data sets, 32
Constellation of skills, 49
*Construct Validity in Psychological Measure-
ment*, 68
Court cases, education-related, 89–92
Court cases, employment-related, 92
Court cases, forensics-related, 95–97
Court cases, influence of social science,
97–105
Court cases, privacy-related, 93–95
Court decisions, influences on testing, 3
Albermarle Paper Co v. Moody, 92, 101
Ballew v. Georgia, 98
Battie v. Estelle, 97
Brown v. Education, 88, 89, 97
Connecticut v. Teal, 102, 104
Debra P. v. Turlington, 88, 91
Estelle v. Smith, 97
Firefighters Institute v. City of St. Louis, 92
Frye v. United States, 96
Greggs v. Duke Power Company, 4, 81, 92,
101
Guardian Association of New York City v.
Civil Service Commission, 92, 102
Hobson v. Hansen, 90, 91

Court decisions, influences on testing (*cont.*)
 Kirkland v. New York State Department of
 Correctional Services, 103
 Larry P. v. Riles, 4, 88, 91, 98, 100
 Merriken v. Cressman, 4, 93
 Olmstead v. United States, 88
 Pase v. Hannon, 4, 91, 92, 99, 100, 105,
 106
 Shell v. Savannah-Chatham County Board
 of Education, 89
 Teal v. Connecticut, 88, 92, 103
 Washington v. Davis, 101, 102
 Criteria selection, 63
 Critical Period of Intervention, 93, 95

D

Decision analysis, 22–23
 Developed abilities, 5, 132–134, 138, 159,
 162–163
 Diagnostic testing, 137

E

Educational achievement, 155
 Definition, 156, 165
Eighth Mental Measurements Yearbook, 65,
 113–114, 117, 120, 122
 Entry behaviors
 Cognitive, 137
 Affective, 137
 Environmental effect, 25
 EQ (educational quotient), 5, 130
 Expert-novice differences, 45

F

Families of jobs, 75, 78
 Factor analytic models of intelligence
 Ferguson, 159–160
 Guilford, 160–161
 Cattell, 161
Foundation of Behavior Genetics, 16
 Fourteenth Amendment, 88

H

Heredity-environment controversy, 130, 117,
 19
 Heritability
 Intelligence, 16

Program research, 27–28
 Special Abilities, 17
 High School and Beyond, 25, 32, 33

I

Item writing technology, 6, 15
 IQ (Intelligence quotient), 5

J

Jangle fallacy, 132, 168
 Jingle fallacy, 132, 168
 Jungle fallacy, 169

K

Knowledge, 141, 143
 Understood knowledge, 141
 Structure of, 6, 156–157
 Understanding, 157

L

Latent-trait theory, 112
 Latent variables (abilities), 33, 48
 Large scale testing, 11
 Learning Potential Assessment Device, 44, 56
 Letter matching task, 42

M

Measurement theory and knowledge, 112
 Mental abilities, study of,
 Cognitive approach, 40–42
 Cognitive contents, 45
 Cognitive correlates, 42–43
 Cognitive training, 44
 Media, anti-testing sentiment, 3, 12, 13
 CBS, 3, 12–13
 Double standard, 13, 15
New York Times, 13, 14, 15, 20
Science, 15
The Washington Post, 14
 Milwaukee Project, 14, 20

N

Novelty test items, 14, 20
 Norms, 115

P R

- Path analysis, 26, 31, 32
- Perceptions of test quality, 3, 23
- Phenotype, 19
- Process-based training programs, 50
- Process scores, 50
- Production functions, 24, 31
- Professional and Administrative Career Examinations, 68
- Propositions, definition, 118
- Prediction vs. measurement, 167–168

- Ratio scales, decision making, 28
- Raven's Progressive Matrices Test, 42–43
- Reliability, 114–116, 120
- Resolution on Scientific Freedom and Heredity, 17

S

- Scholastic Aptitude Test (SAT), 132
- Seventh Mental Measurements Yearbook*, 113
- Situation-based items, 6, 147
- Special vs. general tests of achievement, 24–25
- Standardized tests, 118–119
- Standards for Educational and Psychological Tests*, 64, 101, 122–124
- Semantic encoding, 142
- Sentence Picture Verification Task, 46
- Sternberg's Memory-Scanning Task, 42

T

- Tacit knowledge, 142
- Test anxiety, 55–57
- Test bias, 112
- Test construction (experience pool), 113–117
- Test implementation, 113–117
- Test interpretation, cognitive approach, 49–50
- Test publishing issues, 113–116
- Test selection, 117–122
- Test scoring, cognitive approach, 49–50
- Test technology, 112, 117
- Test usage, 5, 117–121
- Test validation
 - History, 4, 62
 - Criterion-related, 4, 62–64, 65, 68, 76, 112
 - Concurrent, 62
 - Predictive, 63
 - Content, 4, 64, 65, 68

- Construct, 4, 112, 116
 - Construct-referenced, 102
 - Contribution of cognitive psychology, 48–49
 - Definition, 65–66
 - Factor analysis, 67
 - History, 66
 - Latent trait models, 68
 - Multimethod-multitrait, 67
 - State of the science, 68
- Face, 119

Tests

- culture-free, 158–159
- culture-fair, 158–159
- essay, 6, 145–146
- objective, 6, 145–146
- true-false, 148

Tests for decisions

- individual, 22–25
- program, 24

Tests in Print, 113

Tests for business and industry, 120–121

The IQ Myth, 17

V

Validation models, methods

- aptitude by treatment interaction, 72–74
- assessment-classification, 73, 74, 75
- Bayesian validity generalization, 77–78
- Campbell, et al., 74
- developmental-integrative, 74
- Dunnette, 73
- linear, 68–72
- meta-analyses, 78–79
- moderator, 72
- person-process-product, 69, 70
- productivity analysis, 79
- validity generalization, 76–78, 81, 82

Validation research,

- changes, 81
- future, 81
- problems, 81

Validity (see also test validation, validation models), 114–117, 119–120

Validity generalization, 76–78, 81, 82

- Bayesian, 77–78

Value of Testing, 7

- Fairness to minorities, 16
- Poor alternatives, 15
- Scientific value, 15
